Cyber Security Awareness Bulletin:

[Google Releases Security Update for Chrome](#)

04/28/2016

Original release date: April 28, 2016

Google has released Chrome version 50.0.2661.94 to address multiple vulnerabilities for Windows, Mac, and Linux. Exploitation of some of these vulnerabilities may allow a remote attacker to take control of an affected system.

Users and administrators are encouraged to review the [Chrome Releases](#) page and apply the necessary update.
